CORE SKILLS

Automation & workflows

n8n · GitHub Actions schedules ·
process mapping · SOP design ·
human-approval flows

AI agents & assistants

Claude · GPT-4o · Custom GPT
Actions · Whisper voice · RAG with
ChromaDB · NotebookLM and
Gemini Gems

Integrations

WhatsApp Cloud API · Telegram Bot
API · Gmail and Calendar APIs ·
SmartSuite · Fireflies · Fibery

Build & deploy

Python · FastAPI · SQLite · Render ·
Linux VPS · built with AI coding
agents (Claude Code)

EDUCATION

B.Eng, Electrical Engineering

Nnamdi Azikiwe University, Awka ·
2026

PROFILE

I build automation systems that take manual, repetitive operations off the desks of founders and teams. I design and ship AI assistants, scheduled automations and integrations across WhatsApp, Telegram, Gmail, Google Workspace, SmartSuite and n8n. I build with Python and FastAPI by directing AI coding agents, and I keep a person in control wherever a mistake would be costly.

HIGHLIGHTS

28-55 s → 1-5 s

Query time on about
3,300 records in a
ChatGPT task assistant

46 of 50 · 0 failed

Test questions fully answered
by two SOP assistants

2,700+ runs

Scheduled runs across
three live automations,
about 95% successful

EXPERIENCE

CMJ Business Solutions · Employee

Aug 2025 – Present

Automation & AI-Agent Manager

Mar 2026 – Present

- **ChatGPT assistant for the SmartSuite workspace.** Custom GPT and FastAPI on Render, with preview-then-confirm task creation. Query time on about 3,300 records cut from 28-55 s to 1-5 s. Live with 3 pilot users.
- **Overdue-task follow-up.** Python, SmartSuite and Gmail APIs on GitHub Actions send new-overdue alerts, twice-weekly digests and a Saturday report check. 369 overdue tasks across 17 owners in one snapshot; 63 scheduled runs, 54 successful.
- **Fireflies automation.** Human-approved duplicate deletion and AI renaming (956 scheduled runs, 886 successful), plus the Fireflies-to-SmartSuite transcript sync (1,686 runs, 1,634 successful).
- **WhatsApp assistant for the founder.** Text and voice notes create, find, update and cancel calendar events, with reminders and Gmail invite detection. It replaced my earlier Telegram, n8n and Fibery version.
- **Two SOP assistants for a client medical practice** (10 clinical and 27 front-desk SOPs). 21 of 24 and 25 of 26 full passes on test sets, zero failures, and real conflicts between the practice's documents surfaced.
- Wrote the YouTube channel SOP covering weekly workflow, roles and KPI tracking.

YouTube Content Manager & Video Editor

Aug 2025 – Mar 2026

- Managed the YouTube content pipeline and edited video for YouTube and social media, keeping brand style, pacing and release schedule consistent.

The Black Businessman

2025 – Aug 2026

Social Media Manager

- Planned, scheduled and managed content across platforms; tracked KPIs and adjusted strategy from engagement data and audience trends.

INDEPENDENT PROJECT

WhatsApp exam tutor · Personal project

- Answers final-year engineering students from their own course PDFs (ChromaDB retrieval), reads question photos and voice notes, and remembers each student. Built on Claude with prompt caching; complete and ready for real course material.

ALSO & EARLIER

Also skilled in video editing, YouTube content management, Canva, Adobe Creative Suite and Microsoft Office. Earlier: Graphic Designer (2020) and Examination Document Typist (2022-23), Climax Gracious Model Academy.
